A+	Above 75 kgs/person
A	50-74 kgs/person
B+	40-49 kgs/person
B	30-39 kgs/person
C	Under 30 kgs/person

MESSAGE FROM MPSC

We are pleased to provide you with this year's Community Recycling Report.

This report will help you measure the progress of your community's recycling efforts. It also offers you useful benchmarks for measuring the performance of your recycling program relative to approximately 200 other Manitoba community recycling programs funded by the MPSC.

Manitobans continue to make recycling an everyday part of their lives. As a result, last year over 64,700 metric tonnes of packaging and printed material was recycled and reused instead of buried in waste disposal grounds, helping to reduce waste and conserve energy and resources.

Congratulations to your community and thank you for making community-based recycling a tremendous success in Manitoba!

**Mike Fernandes, Senior Manager
Municipal Programs, MPSC**

Grade	Number of Communities receiving this grade
A+	49
A	31
B+	19
B	20
C	58

SETTING GOALS

Use this Report as a starting point for setting goals for your recycling program in four key areas:

1. Improving customer service, including improving resident access and convenience.
2. Developing and maintaining a clear and simple annual recycling promotion and education program.
3. Continuously seeking improvements and cost savings in the operation of the recycling system.
4. Developing and maintaining strong teamwork and cooperation between municipal officials and the recycling service providers.

Set and work towards clear goals for improving in these four areas and you will improve your recycling program—and increased recovery will follow.

Good luck! And remember, the MPSC is here to help you along the way - call or email us with your questions or concerns.
